BMSB SEASONAL MEASURES

Overview BMSB season 2026/27

Duration of the season

Australia: Measures apply to goods shipped to Australia between 1 September and 30 April (inclusive).

New Zealand: Measures apply to goods shipped from 1 September and arriving in New Zealand 30 April.

Developments 2026/27

BMSB seasonal measures have been part and parcel of the process of exporting goods to Australia and New Zealand for quite some seasons now, and have proven to be successful. The new season will follow and build on the experiences of previous seasons.

Target high risk goods (tariff classifications)

- 44
- 45
- 57
- 68
- 69
- 70
- 72
- 73
- 74
- 75
- 76
- 78
- 79
- 80
- 81
- 82
- 83
- 84
- 85
- 86
- 87
- 88
- 89

If you are not sure which code applies to your goods, please contact us. **We can do a compliance check for you!** Please note: tariff classifications 27, 28, 29, 38, 39, 40, 48, 49, 56 do not require mandatory treatment. However, they are subject to increased onshore intervention through random inspection.

- Slovenia
- Spain
- Switzerland
- Türkiye
- Ukraine
- USA
- Uzbekistan

BMSB treatment locations

Please contact our back office for an up-to-date overview of our treatment locations.

BMSB treatment locations

120 hour transhipping window: Goods (FR, OT container or breakbulk) from non-target risk countries that have been in transit in target risk countries for more than 120 hours must still be treated.

120 hour post treatment window: Goods must either be loaded into a container and sealed or loaded onto a vessel for export from the target risk country within 120 hours (AUS: only until 1 Dec.).

Yes

No

Your goods do NOT require treatment.

Your goods do NOT require treatment, however...

Goods within tariff classifications 27, 28, 29, 38, 39, 40, 48, 49, 56 are subject to random inspection.

Your goods DO require mandatory treatment.

Contact one of our experts for advice on the right BMSB treatment method for your goods.

CONSIGNMENT SUITABILITY

Containers should be accessible and sufficient airspace has to be available around the consignment to allow for the circulation of the gas and hot air, placement of any necessary ventilators, heaters and monitoring equipment.

- Free air space of Min. 70 cm must be available above and next to the goods.
- Goods also need to be palletized.
